

# Protecting Wisconsin Youth from HPV-related Cancers

**HPV** is a common **virus**.

Certain **types** of **HPV** are the major **CAUSES** of these cancers:

The **HPV** vaccine, recommended for **boys and girls**, can **REDUCE** the **risk of HPV-related** cancer.

**HPV** vaccination completion, for 13-17 year olds, in Wisconsin is **ALARMINGLY** low.

**WE** can protect our youth from **HPV-related cancer**.

**Include** HPV vaccine in routine vaccination recommendations for adolescents

**Support** a reminder system to improve vaccine series completion

**Promote** recommended HPV-related cancer screening

**Together...**Reducing the burden of **CANCER** in Wisconsin
