

Breast Cancer: #1 Cancer in Wisconsin Women

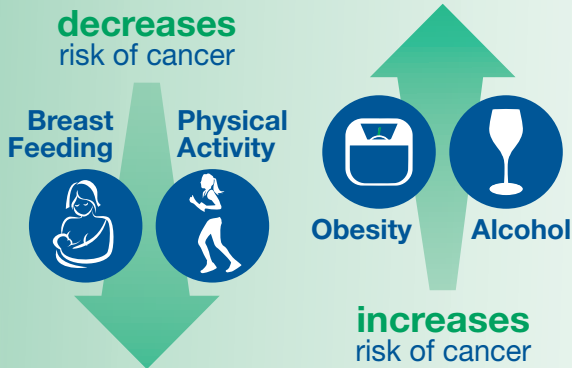

1 in **8**
women will have
INVASIVE breast cancer
during **her lifetime.**

MOST
women who get
breast cancer
do **NOT** have a
family member
with the disease.

PREVENTION matters:

MANY
breast cancers
can be treated
successfully **IF**
detected
early
through screening.

WE can
decrease
breast
cancer
in Wisconsin.

Encourage
healthy
balanced diets

Support
active
lifestyles

Limit
alcohol
consumption

Encourage
breast feeding
friendly
practices

Promote
recommended
cancer
screenings
