Improving **End-of-Life Care** for Cancer Patients: Promoting **Advance Care Planning**

7 out of 10
people have end of life care
concerns:

comfort, pain experienced, costs, and dignity.

1 in 3
physicians are
inaccurate in
predicting their patient's
end-of-life preferences.

Advance care planning conversations can provide a roadmap in decision-making.

ONLY 3 OUT 10 people have had end-of-life care conversations.

Patient Values + Legal Decisions = Advance Directive

WE can improve end-of-life care for cancer patients.

within families

INTEGRATE
advance care
planning
conversations into
routine care

Together...Reducing the burden of **CANCER** in Wisconsin wicancer.org
