

## **Agenda**

- ➤ 2020 2030 Plan Development Overview
- ▶ Updated measures
- ▶ New resources
- ▶ Questions/Discussion

#### The WI CCC Plan 2015- 2020

- A common framework for action in cancer prevention and control
- Designed to provide stakeholders with a vision of what needs to be done to reduce the burden of cancer in Wisconsin
- Consists of 13 priorities and is comprised of several strategies, measures, and action steps
- Also contains 4 cross-cutting issues: health disparities, access to health care, policy systems and environmental change, and workforce development

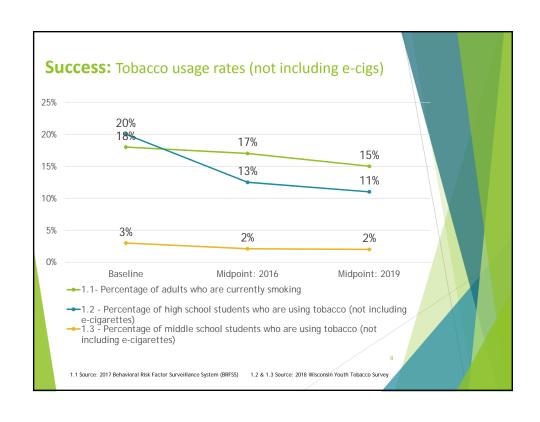

## Midpoint Trends of the WI CCC Plan 2015-2020

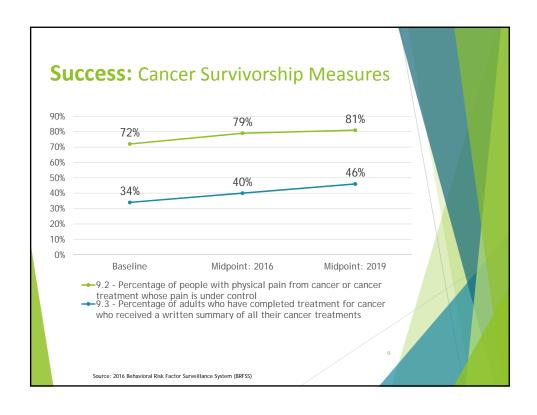

- Several priority measures were unable to be updated
  - Discontinued data source
  - Gap year in Behavioral Risk Factor Surveillance System (BRFSS) cancer data
  - ► Rewording of BRFSS and Youth Risk Behavior Surveillance System (YRBSS) questions
- ▶ Several measures showed promising improvements
  - ▶ A greater % of adults are making healthy decisions
  - Vaccination and some screening procedure rates have increased
- Some startling measures
  - E-cigarette usage rates amongst middle and high schoolers are at an all time high

#### **Successes**

- A smaller percentage of adults are smoking and high schoolers are using tobacco
- A greater percentage of adults and high schoolers were exercising at Department of Health and Human Services (DHHS) and Centers for Disease Control and Prevention (CDC) recommended amounts
- A greater percentage of females and males ages 13-17 completed their HPV vaccination series
- A greater percentage of cancer survivors are receiving written summaries of their cancer treatment and have their pain under control
- A greater number of radon detections and home mitigations were performed

,

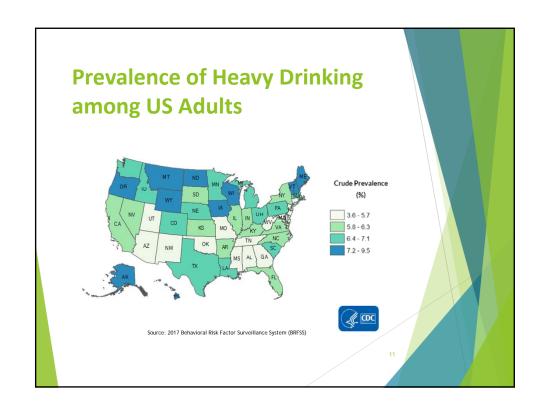

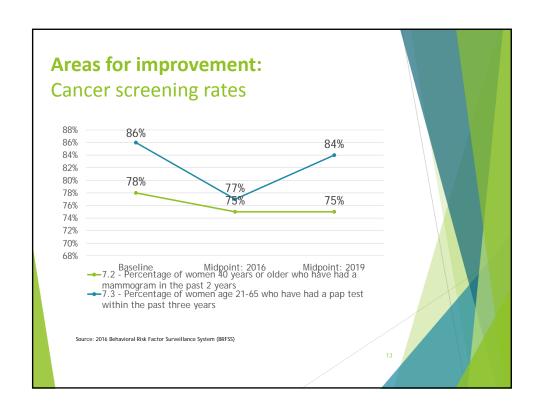

## **Areas for improvement**

- ► A smaller percentage of adults and high schoolers were at a healthy weight
- ► The percentage of adults who were heavy drinkers has not improved
- A smaller percentage of adults were meeting screening guidelines for mammograms and pap tests

0

### **Areas for improvement**

- Current e-cigarette use among Wisconsin high school students increased 154% between 2014 and 2018
- ► In 2018, 20% (or one out of every five) of Wisconsin high school students were using ecigarettes

17

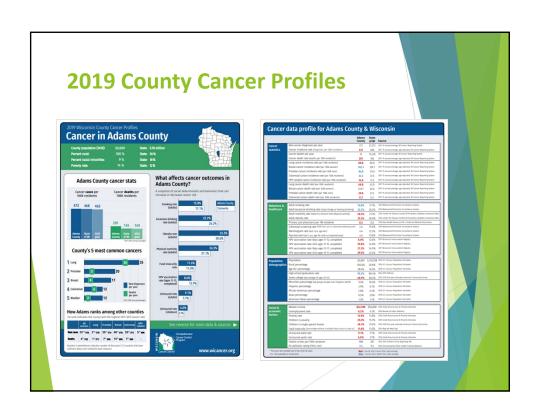

#### **Next steps**

- ► Need for a continued emphasis on areas that have regressed
- ► Apply the knowledge gained from this summary to the development of the WI CCC Plan 2020-2030
  - ▶ Possibly investigate new, reliable data sources

18

# **How to use the County Cancer Profiles**

- ► Start a conversation in your community to raise awareness
- Help with community planning, prioritizing and goal setting
- ► Educate decision-makers

How do you anticipate using these profiles in your work?
