

Wisconsin Cancer Reporting System

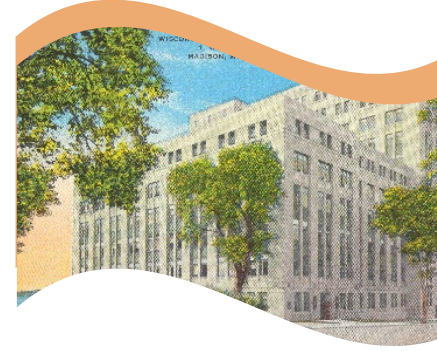

Wisconsin Cancer Summit: November 2, 2023
Lena Swander, MPH, WCRS Epidemiologist

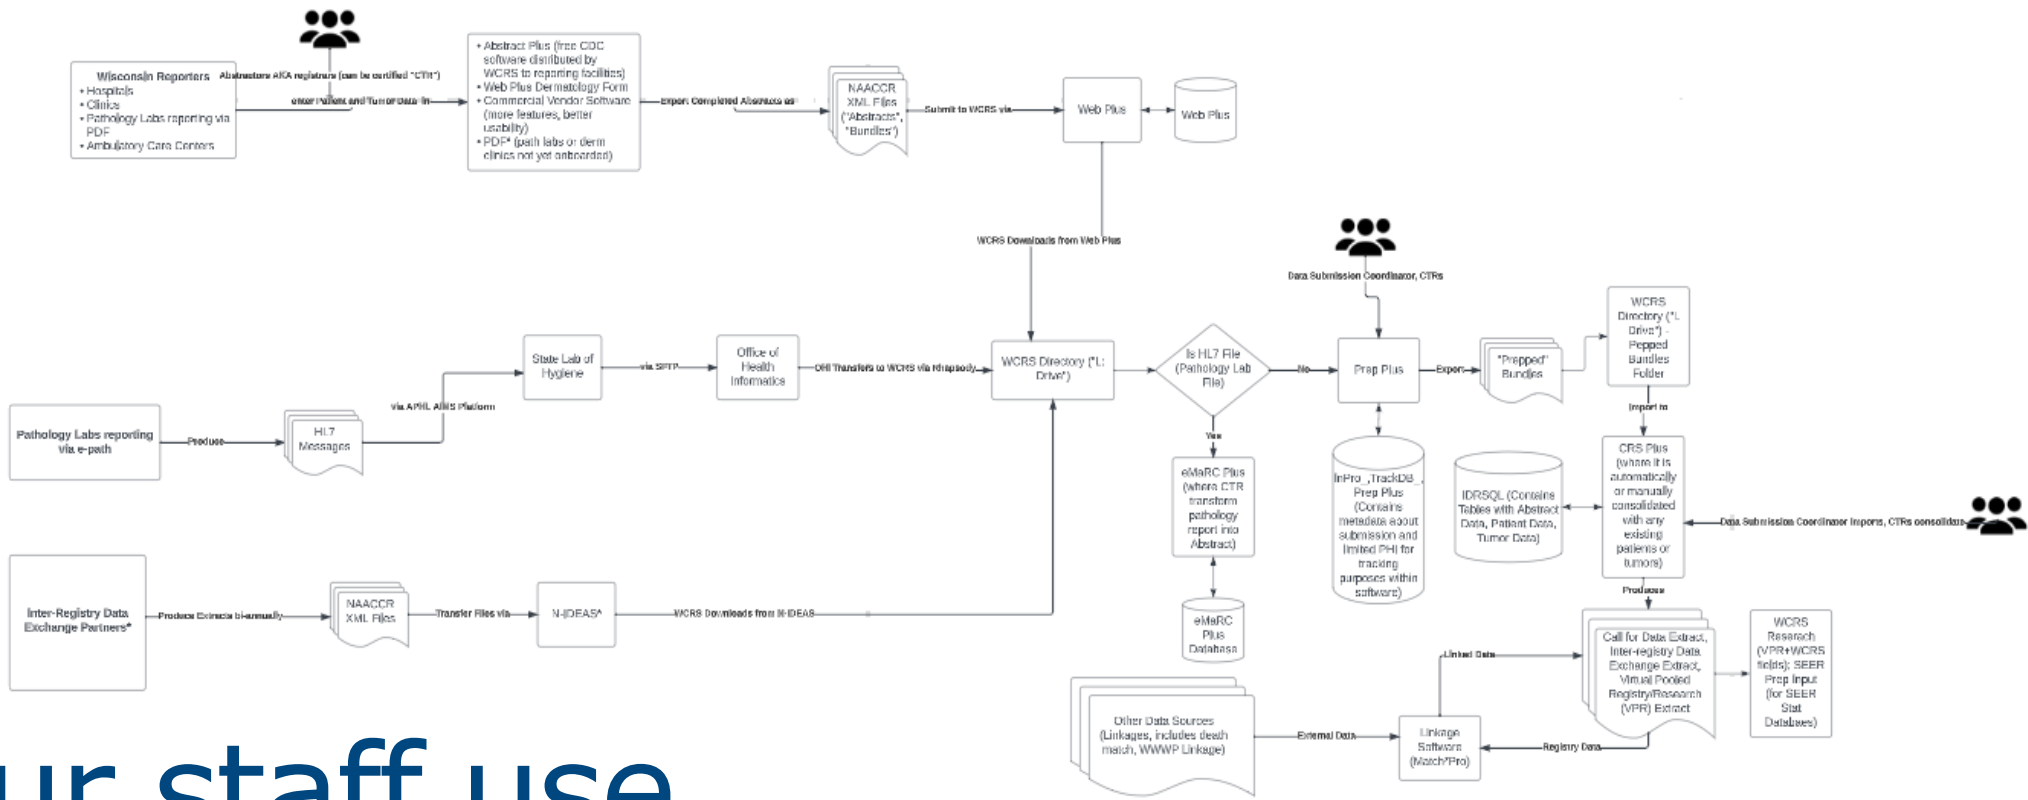

We collect, store, and manage data on persons with cancer.

How does a cancer patient's journey become a statistic?

Our staff use software suites to process, edit, and consolidate incoming data.

Demographics

Stage of
disease

Outcomes

Tumor
characteristics

Treatment

What types of cancers are increasing or decreasing?

Who is most likely to get a certain type of cancer?

Is there a certain part of Wisconsin where women are finding out they have breast cancer at a late stage, when it's harder to treat?

What kinds of questions
can't cancer registry data answer?
What percentage of people in Wisconsin
were screened for colon cancer in 2023?

We support free,
online public portals.
