

Community Health Worker Advanced Trainings

Cancer Awareness Series

Session 1: Cancer Prevention & Risk Reduction

Wednesday, September 10th, 2025

12 pm - 1:30 pm

This session equips Community Health Workers with essential knowledge to support cancer prevention in their communities. Learn about cancer disparities in the U.S. and Wisconsin, explore the American Cancer Society's guidelines on healthy living, and gain tools to educate others on skin cancer, tobacco risks, cancer-preventing vaccines, and environmental hazards like radon. Strengthen your role as a trusted health advocate with practical, evidence-based strategies.

Session 2: Cancer Screening & Early Detection

Wednesday, October 22nd, 2025

12 pm - 1:30 pm

This session empowers Community Health Workers with the latest cancer screening guidelines, highlights disparities in screening rates across the U.S. and Wisconsin, and shares proven strategies to increase early detection. Learn how to guide clients through screening options for breast, cervical, colorectal, lung, and prostate cancers using trusted tools and resources.

Session 3: Cancer Survivorship

Wednesday, November 12th, 2025

12 pm - 1:30 pm

This session helps Community Health Workers understand cancer survivorship, explore survival trends and disparities in the U.S. and Wisconsin, and recognize the evolving needs of survivors—whether in treatment, post-treatment, or long-term. Gain access to trusted tools and resources to better support and guide clients through survivorship care.

Training is being offered in partnership with:

REGISTER HERE

✱ Thanks to our partnership, these sessions are completely free!
